October 8, 2009 - Rosemont, IL - Orthopaedic Learning Center

November 19, 2009 - Henderson, NV - Medical Education & Research Institute of Nevada

DePuy has "moved to the front" in tissue sparing hip surgery. Only DePuy offers an education program that allows surgeons to learn about, share knowledge of and build their experience using the Anterior Approach, as described by Joel Matta, MD. Our dedicated learning centers offer cadaver labs and surgeon presentations that are combined with discussions led by a highly experienced faculty. Courses are planned around an efficient learning structure that covers the full range of the procedure. This provides an effective balance of theory and practical experience with the learning extended to include OR visits.

Please contact your DePuy Sales Associate to register for any of the above courses.\*  
For additional meeting information, contact Cindy Hicks in DePuy Professional Education at (574) 372-5094 or [chicks@dpyus.jnj.com](mailto:chicks@dpyus.jnj.com).

*never stop moving™*
